

6Capsquare Gallery & Show Unit

Corporate Residential

Role: Project Lead

6Capsquare Gallery & Show Unit

Kuala Lumpur, Malaysia, 2010

Role: Project Lead
Studio: Unit One Design

Designed for BRDB Developers, the project is a sales gallery and show unit for the 6Capsquare development in downtown Kuala Lumpur. BRDB is typically known for luxury developments in wealthy suburbs, this project however was targeted at younger professionals and called for a different aesthetic approach to typical luxury apartments. Unit One Design is a studio known for its raw but finely detailed, honest and architectural approach to design.

Featuring a main pedestrian frontage and a directional path linking the carpark behind to the sales gallery, flanked by a continuous blade wall.

A crystalline reception peeps from behind the blade wall and imbues a splash of glowing colour. One of the requirements of the project was to reuse the building materials in the final development lobby. As such, the main (and the most expensive) features of the space; the crystalline wall and the blade wall were designed to be removable; the printed glass and mirror panels were to be reassembled on the final lobby and the cladding panels for the walls were to be used of the ceiling of the development lobby.

An open layout gallery space with expressed services and columns create a raw aesthetic.

The show unit is contained in an elevated vessel; a monumental object sitting within the building shell; a capsule of modern luxury within the spartan space.

Surrounding the site, we introduced a grove of trees to veil the haphazard streetscape and enrich the views from within the show unit.
